1 Introduction

eZFluxBB is an extension eZ Publish which allows FluxBB (formerly PunBB) and eZ Publish to communicate.

1.1 Compatibility

- > php 5.2
- eZ Publish 4.4.x 4.5.x
- FluxBB 1.4.x

1.2 What eZFluxBB does/doesn't do

What eZFluxBB does :

- Recover current user FluxBB in eZ
- Recover statistics
- Recover online users list
- Recover topics with different filters
- Provide login box

What eZFlux doesn't do :

- Synchronization of FluxBB/eZ Publish users.

2 Documentation

2.1 eZFluxBB : List of fetch functions

2.1.1 current_user

2.1.1.1 Summary

Allows to recover informations about current user.

2.1.1.2 Usage

```
fetch( 'ezfluxbb', 'current_user' )
```

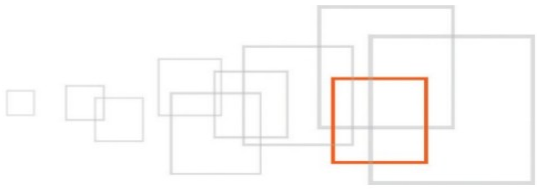
2.1.1.3 Parameters

None

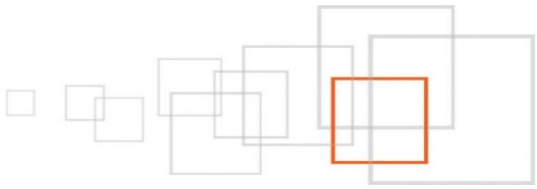
2.1.1.4 Returns

Informations about current user in a hash :

Attribut	Type	Description
id	string	
group_id	string	
username	string	
password	string	
email	string	
title	string	
realname	string	
url	string	
jabber	string	
icq	string	
msn	string	



aim	string	
yahoo	string	
location	string	
signature	string	
disp_topics	integer	
disp_posts	integer	
email_setting	string	
notify_with_post	string	
auto_notify	string	
show_smilies	string	
show_img	string	
show_img_sig	string	
show_avatars	string	
show_sig	string	
timezone	string	
dst	string	
date_format	string	
time_format	string	
language	string	
style	string	
num_posts	string	
last_post	string	
last_search	string	
last_email_sent	string	
registered	string	
registration_ip	string	
last_visit	string	
admin_note	string	
activate_string	string	
activate_key	string	



g_id	string	
g_title	string	
g_user_title	string	
g_moderator	string	
g_mod_edit_users	string	
g_mod_rename_users	string	
g_mod_change_passwords	string	
g_mod_ban_users	string	
g_image	string	
g_read_board	string	
g_view_users	string	
g_post_replies	string	
g_post_topics	string	
g_edit_posts	string	
g_delete_posts	string	
g_delete_topics	string	
g_set_title	string	
g_search	string	
g_search_users	string	
g_send_email	string	
g_post_flood	string	
g_search_flood	string	
g_email_flood	string	
logged	string	
idle	string	
is_guest	boolean	

2.1.1.5 Examples

```
{def  $fluxbb_curent_user = fetch( 'ezfluxbb', 'current_user' )}
```

2.1.2 online

2.2.1 Summary

Recover informations about online users on the forum :

- Total of online users
- Number of online guests
- Number of online members

2.1.2.1 Usage

```
fetch( 'ezfluxbb', 'online' )
```

2.1.2.2 Parameters

None

2.1.2.3 Returns

Informations about online users in a hash :

Attribut	Type	Description
guests	integer	Number of guests on the forum
list	array	List of online members
users	integer	Number of members on the forums
total	integer	Total of persons (guests + members) on the forum

2.1.2.4 Examples

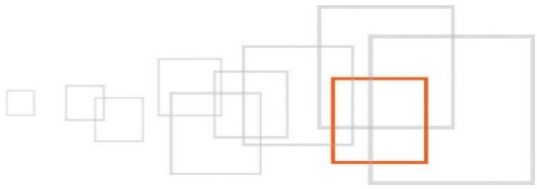
```
{def $fluxbb_online = fetch( 'ezfluxbb', 'online' )}
```

2.1.3 stats

2.1.3.1 Summary

Recover statistics on the forum :

- Number of topics



- Number of posts
- Number of members
- Last member

2.1.3.2 Usage

```
fetch( 'ezfluxbb', 'stats' )
```

2.1.3.3 Parameters

None

2.1.3.4 Returns

Informations about statistics in a hash :

Attribut	Type	Description
last_member	array	Informations about last registered member
num_members	integer	Number of registered members
num_posts	integer	Number of posts
num_topics	integer	Number of topics

2.1.3.5 Examples

```
{def $fluxbb_stats = fetch( 'ezfluxbb', 'stats' ) }
```

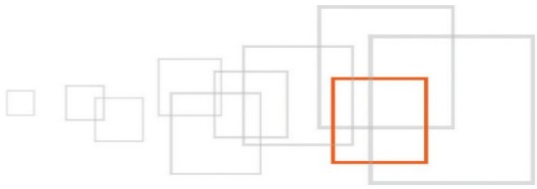
2.1.4 Topics

2.1.4.1 Description

Allows to recover informations about topics of a FluxBB forum.

2.1.4.2 Usage

```
fetch( 'ezfluxbb', 'topics', hash(
[ 'forum_id_filter_type', forum_id_filter_type, ]
[ 'forum_id_filter_array', forum_id_filter_array, ]
[ 'limit', limit, ]
[ 'offset', offset, ]
[ 'sort_by', offset, ]
) )
```



2.1.4.3 Parameters

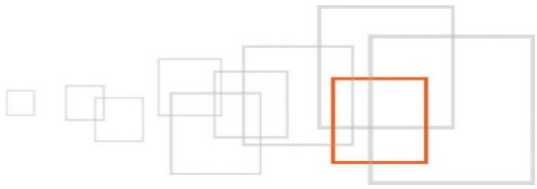
Attribut	Type	Description	Required	Default
forum_id_filter_type	string (include| exclude)	Determine filter on id_forum as inclusive or exclusive	No	include
forum_id_filter_array	mixed	List of id_forum to filter	No	false
limit	integer	Recover the x subjects	No	20
offset	integer	Recover from subject x	No	0
sort_by	array	Order	No	array('t.posted', false)
group_id	integer	Restrict to permissions of a group. If not fill in then recover subjects from every forums without discrimination (even private forums)	No	
get_first_message	boolean	Recover or not first post of each topic	No	false

2.1.4.4 Returns

Use attribute(show) to know ;-)

2.1.4.5 Examples

```
{def $news = fetch( 'ezfluxbb', 'topics', hash(
    forum_id_filter_type, 'include',
    forum_id_filter_array, $block.custom_attributes.id_forums,
    limit, $block.custom_attributes.limit_topics,
    get_first_message, true()
) ) }
```



2.2 eZFluxBB : List of templates operators

2.2.1 bbcode2html

2.2.1.1 Description

Allows to transform text of bbCode syntax into HTML.

2.2.1.2 Usage

```
input|bbcode2html()
```

2.2.1.3 Parameters

None

2.2.1.4 Returns

Text into HTML.

2.2.1.5 Examples

```
{$n.message|bbcode2html()|strip_tags()|shorten(200)|wash()}
```

2.3 eZFlow avalaible blocks

2.3.1 eZFluxBB Online

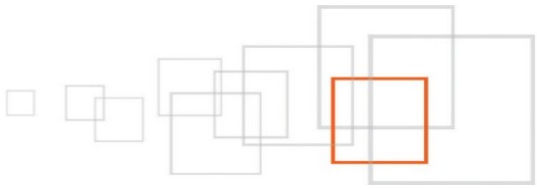
Display a online FluxBB user block.

2.3.2 eZFluxBB Stats

Display a stats block.

2.3.3 eZFluxBB Topics

Allow you to display a list of topic using some parameters.



2.3.4 eZFluxBB LoginBox

Display a FluxBB login form or you personnals informations.
