Sumary

1 eZFluxBB (Connective FluxBB for eZ publish)

eZFluxBB is an extension eZ publish which allows FluxBB (formerly PunBB) and eZ Publish to communicate.

1.1 Compatibility

php 5.2 / eZ 4.0.x & **FluxBB / PunBB 1.2**.

From branch 1.3 just FluxBB compatibility will be provide.
eZFluxBB will soon match FluxBB 1.3 (#56). For the moment the compatibility is partial (the fetch current_user doesn't work in 1.3).

1.2 What eZFluxBB does/doesn't do

What eZFluxBB does :

- Recover current user FluxBB in eZ
- Recover statistics
- Recover online users list
- Recover topics with different filters

What eZFlux doesn't do :

- Synchronization of FluxBB/eZ Publish users.

1.3 Download eZFluxBB

From sources of SVN : `svn co https://svn.llaumgui.com/ez_publish/ezfluxbb/trunk`

1.4 Documentation

- en/eZ Publish/eZFluxBB/fetch
- en/eZ Publish/eZFluxBB/operator

2 eZFluxBB : List of fetch functions

2.1 current_user

2.1.1 Summary

Allows to recover informations about current user.

2.1.2 Usage

```
fetch( 'ezfluxbb', 'current_user' )
```

2.1.3 Parameters

None

2.1.4 Returns

Informations about current user in a hash :

Attribut	Type	Description
group_id	integer	ID of the user group
id	integer	ID of the user
last_visit	integer	Timestamp of the last visit
username	string	Login of the user

2.1.5 Examples

```
, hash('%user', concat('<a title="', $fluxbbCurentUser.username, '" href="', ezini( 'FluxBBInfo', 'BoardURL',
, hash('%date', $fluxbbCurentUser.last_visit|datetime('full')) )}</li>

tion=show_new">{"Show new messages since last visit"|i18n('design/fedora_socle/templates/page_toptoolbar')}</a>
on=markread">{"Mark all topics as read"|i18n('design/fedora_socle/templates/page_toptoolbar')}</a></li>
```

2.2 Online

2.2.1 Summary

Recover informations about online users on the forum :

- Total of online users
- Number of online guests
- Number of online members

2.2.2 Usage

```
fetch( 'ezfluxbb', 'online' )
```

2.2.3 Parameters

None

2.2.4 Returns

Informations about online users in a hash :

Attribut	Type	Description
guests	integer	Number of guests on the forum
list	array	List of online members
users	integer	Number of members on the forums
total	integer	Total of persons (guests + members) on the forum

2.2.5 Examples

```
 'ezfluxbb', 'online' )

_map.id_css.has_content} id="{$object.main_node.data_map.id_css.content}"{/if} class="block {$object.main_node
de.name|wash()}</span></h3>

line.guests}</strong> {"invités"|i18n('design/fedora_socle/global')}</li>
line.users}</strong> {"membres"|i18n('design/fedora_socle/global')}</li>

st)|gt(0)}
bbOnline.list)|dec()}

.list as $key => $user}
FluxBBInfo', 'BoardURL', 'ezfluxbb.ini' )}/profile.php?id={$user.user_id}">{$user.ident}</a>{if $key|lt($nbUse
```

2.3 stats

2.3.1 Summary

Recover statistics on the forum :

- Number of topics
- Number of posts
- Number of members
- Last member

2.3.2 Usage

```
fetch( 'ezfluxbb', 'stats' )
```

2.3.3 Parameters

None

2.3.4 Returns

Informations about statistics in a hash :

Attribut	Type	Description
last_member	array	Informations about last registered member
num_members	integer	Number of registered members
num_posts	integer	Number of posts
num_topics	integer	Number of topics

2.3.5 Examples

```
="{$object.main_node.data_map.id_css.content}"{/if} class="block {$object.main_node.data_map.class_css.content}
/h3>

rong> {"sujets"|i18n('design/fedora_socle/global')}</li>
ong> {"réponses"|i18n('design/fedora_socle/global')}</li>
trong> {"membres"|i18n('design/fedora_socle/global')}</li>
_socle/templates/stats')} : <a href="{ezini( 'FluxBBInfo', 'BoardURL', 'ezfluxbb.ini' )}/profile.php?id={$
```

2.4 Topics

2.4.1 Description

Allows to recover informations about topics of a FluxBB forum.

2.4.2 Usage

```
fetch( 'ezfluxbb', 'topics', hash(        [ forum_id_filter_type,        'include', ]
                                          [ forum_id_filter_array,       array( 2, 3 ), ]
                                          [ limit,                       10, ]
                                          [ offset,                      0, ]
                                          [ sort_by                      array( 't.posted', false() )

) ) )
```

2.4.3 Parameters

Name	Type	Description	Required	Default
forum_id_filter_type	string (include|exclude)	Determine filter on id_forum as inclusive or exclusive	No	include
forum_id_filter_array	mixed	List of id_forum to filter	No	false

limit	integer	Recover the x subjects	No	20
offset	integer	Recover from subject x	No	0
sort_by	array	Tris	No	array('t.posted', false)
group_id	integer	Restrict to permissions of a group. If not fill in then recover subjects from every forums without discrimination (even private forums)	No	
get_first_message	booean	Recover or not first post of each topic	No	false

2.4.4 Returns

Use attribute(show) to know ;-)

2.4.5 Examples

```
content,
tent ))}

id={$n.post_id}#{$n.post_id}">{$n.subject|wash()}</a></h3>
)}" href="{ezini( 'FluxBBInfo', 'BoardURL', 'ezfluxbb.ini' )}/viewtopic.php?pid={$n.post_id}#{$n.post_id}">{"L
```

3 eZFluxBB : List of templates operators

3.1 bbcode2html

3.1.1 Description

Allows to transform text of bbCode syntax into HTML.

3.1.2 Usage

```
input|bbcode2html()
```

3.1.3 Parameters

None

3.1.4 Returns

Text into HTML

3.1.5 Examples

```
',
}

post_id}#{$n.post_id}">{$n.subject|wash()}</a></h3>
t|wash()}" href="{ezini( 'FluxBBInfo', 'BoardURL', 'ezfluxbb.ini' )}/viewtopic.php?pid={$n.post_id}#{$n.post_i
```
